3D LAMINATING & FINISHING SOLUTIONS

## SUPERIOR PRODUCTS. EXCEPTIONAL SERVICE.

Pressroom and Finishing Tools / Membranes /  
3D Laminate Storage Racks  
and the **know-how** to help you make  
the **most** of your production!

**SmartechOnline.com**

## STEADY|MIX

The **Steady|Mix** **eliminates** fatigue and guesswork when mixing two-part adhesives, conversion varnish, or other finishing products.

Choose the right size mixing paddle, use the flow control valve to set the mixing speed for an ideal vortex, place the hardener or catalyst container in the cupholder and let the **Steady|Mix** do its job for 15 minutes while you get other things done.

Adjustable for 1 to 5 gallon jobs, the **Steady|Mix** ensures that whatever you need to add will be steadily and evenly incorporated into your base product for optimal performance.

Steady|Mix with  
a 5 gallon paddle

With the hardener in the  
cup holder, the **Steady|Mix**  
does its job

The **Easy|Axis** foot-rotated turntable lets you turn parts being sprayed with adhesives or finishes completely **hands-free**.

The tube shaped support column eliminates blow-back while you're spraying. Two easily changed top plate sizes come with each unit, and you can choose between non-slip surfaces or elevation pins. All of the outer surfaces are HDPE, guaranteeing easy cleanup of both glue and finish residue.

Top plate options  
*Large: 7" x 11½" Small: 5½" x 7½"*

Perfect for **glue application**  
& **finishing**

## VERSA|TRIM & DURA|RACK

We designed the **Versa|Trim** specifically to be **more agile** when trimming complex profiles, or those with multiple openings.

The **Versa|Trim's** compact size makes trimming between cut-outs in close proximity to each other far easier than with a larger knife. The **Versa|Trim's** handle is engineered to hold the blade at a position to ensure a flush trim in a single pass.

Smartech's **Dura|Rack** holds glued and finished parts for safe, **worry-free** drying.

You've told us about your struggles with other racks, so we designed ours with:

- **Hefty powder-coated steel** construction that's built to last and can **hold 1200+ lbs.**
- **34-rows** of horizontal support rods spaced to hold both large and small parts **securely.**
- **Replaceable**, coated paper tubes that cover the support rods to keep both the rack and **your product clean.**
- The support rods can be **adjusted side-to-side** or even removed to hold **thick or deep parts.**

# MEMBRANES & ROLL RACKS

Steinbach has supplied top-quality membranes since the **beginning** of **3D Laminate technology**.

With a variety of silicone mixtures, thicknesses, and surfaces, as well as two types of natural rubber, **Smartech** has the right **Steinbach Membrane** for your application. We also have the experience to help you choose the right material for your application.

Our Racks are **custom-built** in motorized and manual revolving styles to fit your space, needs, and budget. The **HS-Series** motorized racks are up to 21' tall and can hold from 10-46 full-size rolls of **3D Laminate**. The manually operated **Revolving Rack** holds up to 20 smaller rolls in under 80". Both racks can be paired with a cut-to-length system and are **easy to install**. Keep your laminate investment where you need it – by your membrane press!

Let us help you improve  
your **3D Lamination!**
